

## Youth Education through Motorsports

Carl J Bilski 78- having spent the last 65 years building cars- tractors and street rods, he now finds himself at a slower pace **but-** not at all stopped- so- now being physically challenged brings him to his latest project-

### “The Challenger”

A mobility van, the same as he gets around himself- but- it looks like a race car- has a double roll- cage to be able to take a young handicapped child for a “challenge the ride” ride in the race van, no it won’t go real fast but it will be a short, loud, and a fun race ride in a new world for him or her!
